Introduction use of the certification mark f-gases

Now that your company is certified, you want to show it. And you may. The certification demonstrates that your company can deliver reproducible quality, and that your organisation is involved and is organised professionally.

It is a clear message that deserves to be visible to your customers and the market. Use the ECH certification mark f-gases for this. In this manual we indicate how to do that correctly. In this way, the use of the certification mark f-gases is uniformly regulated, which improves clarity.

In this styleguide we indicate where and how the certification mark f-gases may be applied. If you want to use the certification mark f-gases in a way not described in this styleguide please contact us. We will check the possibilities for you.

Basic guidelines

Formats

We make the certification mark f-gases available in a variety of formats. This allows you to apply the certification mark f-gases to your letterhead or add it to your e-mail signature and you can have the certification mark f-gases printed on your company vehicles.

Colour

You can use the certification mark f-gases as described in the colour specification. Specific wishes are only possible in consultation.

Verification

The certification mark f-gases is part and parcel of your company's certification. This means that control audits will verify that the certification mark f-gases is properly applied.

Agreement

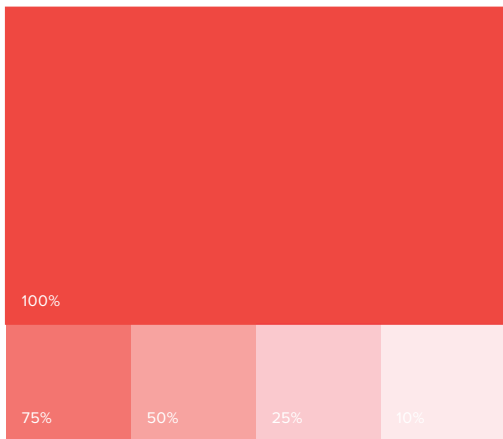

The certification agreement entered into between your company and ECH-Groep formally regulates the authorization of the the certification mark f-gases. It also contains the terms that apply if certification is discontinued, suspended or revoked and the consequences this has on the use of the the certification mark f-gases.

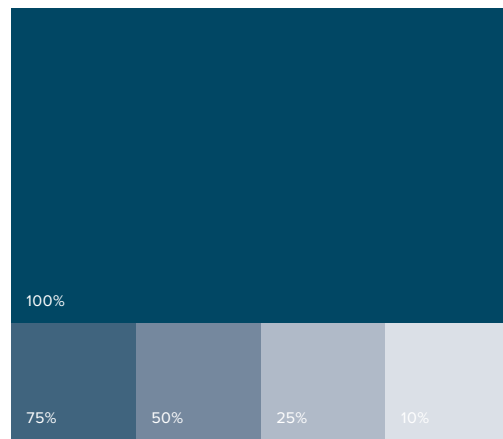

Colour composition

These colours come from the corporate design of ECH-Groep and have formed the basis for the use of color in the the certification mark f-gases. The colour of the texts and circles are a derivative of this, these are shown in 80% blue.
